Career Objective

A motivated junior Front-End Developer with expertise in HTML, CSS, JavaScript, and React.js. I aim to contribute to building user-centric, responsive, and high-performance web applications while continuously developing my technical and problem-solving skills. Proficient in translating design mockups into interactive interfaces and optimizing web applications for speed and scalability. Skilled in collaborating within agile teams to deliver seamless user experiences that meet business goals.

Education

Bachelor's Degree in Commerce and Business Administration

Accounting Department, Helwan University

May 2002

General Grade: Good

Work Experience
